

Monika has developed a highly professional and competent task during the months she has stayed with us

During the summer period, T4S focus its training action on children: summer camps in English. Monika has taken an active role in this task, carrying out workshops and activities with pedagogical contents and aimed at teaching English as a foreign language

The rest of the time Monika has become an active member in many kinds of tasks. In a first phase, she has helped to develop pedagogical resources for primary and secondary grade, always focusing on the conversation content. She has complemented this activity with the development and filing of Business English Resources.

In all the duties within the pedagogical area Monika has always had a positive and collaborative attitude. The result of the experience has been very satisfactory

Best regards

Diana Colomer
